Environmental Data

Working with GroundSure and other partners, we supply an industry leading range of products combining accuracy and data quality with ease of interpretation and use.

centremapslive.com

...the future of mapping

Products available for on-line order and delivery include :

GroundSure MapInsight

The most comprehensive collection of large and small scale historical mapping. Includes all Historical Town Plans at no extra cost.

Scanned at 508 dpi, far higher than the current market offering. Combined with more comprehensive and complete data information, this ensures historical mapping of unprecedented quality, accuracy and integrity.

GroundSure EnviroInsight

An environmental data report providing condensed, high quality environmental data in an easy to use report format. Includes an aerial photograph of the site.

Represents a new quality standard and enhanced levels of data, choice, flexibility and clarity.

GroundSure GeoInsight

A clear and comprehensive Geological Assessment. Uniquely, it also details and illustrates the Geohazard and Ground Stability ratings for a site.

In combination, these products form the **GroundSure Insight** pack, giving you the complete picture.

Geological Data

Available separately, in a unique 'Layered PDF' format at scales of 1:10000 and 1:50000. BGS Geosure Ground Stability ratings can also be included in this format. Vector formats are also available.

Underground Utility Searches: Delivered in PDF format as soon as the requested information becomes available. A hard copy pack of all the information is also produced and posted out after 15 days. This is the usual time it takes to collect all of the relevant information.

Features & Benefits

- Higher Resolution Mapping
- More accurate information
- Easier to use
- Advanced graphical representation of each data element
- Aerial photographs give you an immediate view of the site
- Superior map representation of Geology and Geohazards

Ordering and Delivery

Groundsure Environmental Reports and Historic Mapping can be ordered directly from **centremapslive**, allowing you to define the exact site you require. They are supplied as A4 (reports) and A3 (maps) Adobe PDF files and are available for download within a couple of hours. A printing service is also offered.

The full range of mapping can be downloaded simply and quickly from **centremapslive.com**

Imagery and height datasets

Data is sourced from a range of suppliers including Ordnance Survey®, NextMap, BLOM, GetMapping, Cities Revealed, the Environment Agency, NPA Group and Infoterra.

Aerial Imagery, for most sites is available in a choice of dates and resolutions. Available as PDF or geo-referenced TIFF.

Height data is available in a range of accuracies and includes both Digital Terrain & Surface Models, presented as either contours or grids. Data collection methods vary and include LiDAR, IFSAR, Photogrammetry and Surveyed Data. Available as vector (DXF/DWG) and grid formats on request or combined with other datasets as TIFF/PDF.

Advanced Imagery Measurement System

Centremapslive.com is now giving construction industry professionals access to an exciting new product BlomURBEX – a solution centred on base technology and imagery provided by Blom and delivered online by centremapslive.com. This unique product combines oblique aerial imagery with a state-of-the-art software system that provides unparalleled visual intelligence.

This is a significant step forward in the application of oblique aerial photography with online tools for taking bearings, distance, area and most significantly height measurements directly from the screen.

OS MasterMap®

The Ordnance Survey Large Scale Dataset. Available in raster and vector formats.

Ordnance Survey Raster products

1:10000, OS Streetview, 1:25000, 1:50000, 1:250000 and OS Miniscale datasets in image formats or Adobe PDF.

OS Plan Design & Build (PDB) Licences

New Ordnance Survey PDB Licence. Enables data sharing, multi-year licensing and data archiving.

GroundSure Environmental Reviews

A range of environmental reviews, which include consultant analysis, provide reliable risk screening suitable for both residential and commercial use.

UK Land Survey Register

Unique – Access to the 'UK Land Survey Register' which identifies the locations, around the UK, of existing large scale topographical, measured building and underground services surveys that have been carried out by members of The Survey Association.

Geospatial Data for Northern Ireland, from **Land and Property Services**, is now available on-line. This includes small and large scale mapping, historical mapping, aerial imagery and height information.

Your next step

Log on to **www.centremapslive.com** and register. Follow the straightforward step-by-step guide to place your order.

Alternatively call 01886 832972 or e-mail enquiries@centremaps.co.uk for further information.

....centremapslive.com is different

- Creating maps and data since 1975
- Unrivalled product range selected on a 'best of breed' basis
- Unique 'layered' Adobe PDF solutions
- Simple mapping licence and archive management
- Complete national benchmark finder and listing
- Free training/technical support
- Added value from 'in-house' land survey teams
- Advanced height, distance and area measurement tools
- Northern Ireland Data on-line
- Mac and PC compatible interface
